

Zaid Ahmed

Full Stack Developer | AI Developer

✉ zaidlaiq99@gmail.com ☎ +92 3162324937  [LinkedIn](#)  [Github](#) 📍 Karachi, Pak

SUMMARY

Results-driven Full Stack Developer and AI enthusiast with experience in building scalable web applications and smart software solutions. Skilled in frontend and backend development, Python programming, and AI/ML concepts. Experienced in improving system efficiency, automating workflows, and delivering reliable, user-focused applications. Strong problem-solving skills with the ability to turn ideas into functional, high-quality solutions. Passionate about learning emerging technologies and creating impactful software that solves real-world problems.

WORK EXPERIENCE

Software Developer - MISL

Feb 2026 - Present

- Leading and managing full-stack web development projects, including end-to-end website design, deployment, and scalable web solution development.
- Designing and optimizing SCM (Supply Chain Management) and MRP (Manufacturing Resource Planning) systems to streamline business operations and improve efficiency.
- Developing AI-based applications, including chatbot, ANPR systems for automated communication and License Plate Recognition solutions using computer vision.
- Collaborating with cross-functional teams to deliver secure, high-performance, and production-ready applications.

Full Stack Developer – ERP Wallet

Aug 2025 - Oct 2025

- Developed scalable web applications using Angular and NestJS.
- Built modular and reusable Angular components for maintainable frontend architecture.
- Designed and integrated secure RESTful APIs.
- Implemented real-time data management and optimized application performance.
- Collaborated with cross-functional teams to deliver production-ready features.

Junior Faculty Member - Aptech Learning North Nazimabad

Dec 2024 - April 2025

- Delivered lectures and practical training sessions in Web Technologies.
- Taught HTML, CSS, JavaScript, and modern web development concepts.
- Designed assignments and hands-on projects to enhance student learning.
- Mentored students and evaluated technical performance.

Software Developer Internship - Elektro Control Industries(PVT) *Aug 2024 - Oct 2024*

- Contributed to software development projects following industry best practices.
- Assisted in designing, developing, and testing application features.
- Collaborated with senior developers to improve system performance and functionality.
- Gained hands-on experience in debugging, version control, and deployment workflows.

- Developed and trained machine learning models using Python and TensorFlow for predictive analytics tasks.
- Performed data preprocessing, feature engineering, and model evaluation to improve model accuracy.
- Applied hyperparameter tuning techniques to optimize performance.
- Built scalable and reliable ML solutions aligned with real-world business use cases.

EDUCATION

Karachi Institute of Economics and Technology - BSAI

2022 - 2026

- Completed comprehensive coursework in Machine Learning, Deep Learning, Computer Vision, Data Structures, and Artificial Intelligence.
- Developed academic projects focused on predictive modeling, AI automation, and intelligent systems.
- Gained strong foundation in Python, data analysis, and AI model development.

Google Developer Student Club (GDSC) – KIET University

2023 - 2026

- Contributed to organizing technical workshops, coding sessions, and developer-focused events.
- Collaborated with team members on community-based tech initiatives and student projects.
- Assisted in mentoring students in web development and AI-related technologies.

SKILLS

Frontend Development

- HTML5, CSS3, JavaScript
- Angular, React, TypeScript

Backend Development

- Node.js, NestJS, Next.js
- PLpgSQL (PostgreSQL/SQL)
- REST APIs

Programming & AI/ML

- Python (for scripting and automation)
- AI / Machine Learning (Model Development, Predictive Analytics)
- Data Analysis
- Jupyter Notebook, Streamlit

DevOps & Version Control

- Docker
- Git, GitHub

PROJECTS

MECO Pakistan – Web Application

- Headless product catalog with real-time inventory updates and "Sold Out" badges.
- Cloud-controlled marketing banners and automated lead capture forms.
- Secure authentication using Firebase Auth (Google & Email).
- Optimized performance with React 19, Vite, and Tailwind CSS for sub-second loading times.

MRP - Manufacture Resource Planner

- Built a full-scale MRP platform with six modules managing inventory, manufacturing, and sales operations.
- Developed using React, Vite, Material-UI, and Supabase with RBAC, real-time sync, and OAuth authentication.
- Implemented complex database structures and workflows for products, orders, and inventory processes.

ANPR System

- Engineered real-time ANPR system using YOLOv8 for plate detection and optimized EasyOCR for accurate character recognition.
- Built video processing pipeline with Ngrok and automated data logging via Firebase/Cloudinary.
- Developed interactive dashboard with Next.js 16, React 19, and ApexCharts for real-time monitoring and analytics.

AI Robot Path Planner using Deep Q-Network (DQN)

- Implemented Deep Q-Learning with ϵ -greedy strategy and experience replay.
- Interactive Streamlit dashboard to visualize training and agent movement in real time.
- Visual path display on a grid map and performance tracking through episode rewards.
- Configurable parameters including grid size, episodes, and learning rate

DQN Mountain Car – Gymnasium

- Double DQN with soft target updates for stable training.
- Experience replay, state normalization, and custom reward shaping to improve learning efficiency.
- Gradient clipping and stochastic epsilon decay to stabilize training.
- Visualization of rewards, losses, and agent movement using plots and rendering.

REFERENCE

- Available Upon Request.
